The screenshot shows a window titled "ATM parameters" with a subtitle "ATM VPI/CI value". Below the subtitle, there is a text instruction: "Configure the VPI/CI value. This value should be provided by your ISP". A label "VPI/CI" is positioned to the left of a dropdown menu that currently displays "8\*35" with a downward arrow. Below the dropdown, the text "Select the correct VPI/CI value" is displayed. At the bottom right of the window, there are three buttons: "< Back", "Next >", and "Cancel".
